GTX Corporation Announces GTXImage CAD™ Series Version 11.5!

Scottsdale, Arizona – October 30, 2008 - GTX® Corporation, today announced its NEW Series of the GTXImage CAD™, Version 11.5 products. This unique, cost-effective solution brings legacy paper drawings into CAD-EDM-GIS environments. The GTXImage CAD™ Series, Version 11.5 product line now includes enhanced raster editing features, along with the AutoCAD 2008 OEM engine. With the new release, GTX continues as the leader in providing *Intelligent Paper to CAD Solutions*® in raster editing and conversion software for the Technical Imaging market.

Integrating the AutoCAD 2008 OEM engine, combined with the strength of GTX engineering and development, the newest GTXImage CAD™, Version 11.5 standalone software includes performance improvements and full compatibility with the AutoCAD 2008 DWG environment, without the necessity of a separate copy of AutoCAD. The Version 11.5 Series consists of the following products: GTXImage™ CAD V11.5 for hybrid raster editing and GTXImage CAD™ Plus V11.5 which includes the features of GTXImage™ CAD as well as raster to vector conversion. As in previous versions, the user has the ability to reduce color or grayscale files from a range up to 16 million colors down to a range between 256 and 4 colors, or even bitonal (black and white) images.

Andrew M. Ling, President and CEO of GTX Corporation, stated, "The new GTXImage CAD™, Version 11.5 Series, products will enable new and existing GTX customers to make the most of their investments in managing archival files. Our software will increase design productivity, speed and flexibility, and have 100% compatibility with the AutoCAD® 2008 DWG format, without the need to run a separate license of AutoCAD for raster editing and raster to vector conversion." Andrew Ling continued, "We are pleased to continue our 24-year tradition of providing our customers with the most advanced tools for their technical imaging requirements."
