## ***GTX Corporation Announces GTXImage CAD™ Series Version 8.8!***

**Scottsdale, Arizona – September 28, 2006** - GTX® Corporation, today announced its improved GTXImage CAD™, Version 8 series products. This unique, cost-effective solution brings legacy paper drawings into CAD-EDM-GIS environments. The GTXImage CAD™ Series, Version 8.8 product line now allows for reduction and separation of scanned color/grayscale drawings, maps, and other color digital images. GTX continues as the leader in providing *Intelligent Paper to CAD Solutions*® in raster editing and conversion software for the Technical Imaging market.

Based on the AutoCAD OEM engine and the strength of GTX engineering and development, the newest GTXImage CAD™, Version 8.8 standalone software includes performance improvements and full compatibility with the AutoCAD 2004/2005 DWG environment. The Version 8.8 Series consists of the following products: GTXImage™ CAD V8.8 and GTXImage CAD™ Plus V8.8. Using the GTXImage CAD™ Series, Version 8.8 makes it possible to reduce color or grayscale files from a range up to 16 million colors down to a range between 256 and 4 colors, or even bitonal (black and white) images.

Dr. Marvin Ling, President and CEO of GTX Corporation, stated, "The new GTXImage CAD™, Version 8.8 Series, products will enable new and existing GTX customers to make the most of their investments in hardware, especially color scanners and plotters. Our software allows them to increase design productivity, speed and flexibility, and have 100% compatibility with the AutoCAD® 2004/2005 DWG format, without the need to run a separate license of AutoCAD for raster editing and raster to vector conversion." Dr. Ling added, "GTX has been producing industry-leading products for more than 22 years now! And, at a very competitive price, we provide users with the most advanced tools so far for their technical imaging requirements. "

The GTXImage CAD™, Version 8.8 Series includes image enhancement and clean up tools as well as raster and hybrid editing, Raster-to-Vector conversion and Intelligent Character Recognition, and is very easy to learn and use! Complete details regarding the GTXImage CAD™, Version 8.8 Series Products are available through GTX Sales and Marketing and their Authorized Distributors and Dealers.
